

# Discovering My Feelings

Interactive workbook to guide children aged 4-7 years through the process of learning about their emotions

by Donna Mahoney

Hello and thank you for purchasing Discovering My Feelings. My passion in life is working with children, adolescents and families to empower them to take control of their lives and live their best life possible.

For over 20 years I have been known for the work I do as a child, adolescent and family counsellor. I also write personal development programs for all ages and facilitate them around Australia and internationally.

A lot of the work I do is with indigenous children and I found that there was very little in the way of resources available to allow indigenous children to identify with the characters being used. I have created a unique set of indigenous characters that are used throughout my resources to provide indigenous children with a sense of self when working through the activities. All resources are available in boy/girl and caucasian/indigenous combinations.

Should you have any queries in relation to any of the resources, requests for additional resources or my work in general please email [adminteam@innatetherapies.com](mailto:adminteam@innatetherapies.com)

This book is designed for adults to guide children aged 4-7 years through learning to identify their feelings.

Your role is to support the child to go through each page and talk to them about what they are discovering about themselves. Some children will need a little more prompting than others and this is ok, just be careful to make sure that it is about them and not your interpretation of the work they are doing.

You will need to offer them a range of pencils/felt pens/crayons with a choice of colours to allow them to fully express and get to know their feelings.

We all have feelings. There are many different feelings that you might have. With some of your feelings other people may be able to tell how you are feeling by the look on your face. Lots of things can change your feelings every day - things like where you are, things you do, things other people say and even what you eat.

What do feelings look like? Let see if you can match the feelings that go with each facial expression. Draw a line to match the feeling with the picture.

Disappointed

Excited

Surprised

Sad

Angry

Happy

Scared

Let's now go through each feeling and see what it looks and feels like for you.
